DETAILED ACTION

Acknowledgement is made of receipt and entry of the amendment filed on 05/09/2007.

Examiner acknowledges that claims 75-78 have been withdrawn from consideration.

Claims 31-74 are under examination.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31-74 still stand rejected under 35 USC 103(a) as being unpatentable over Romanczyk, Jr. (US 5,554,645) in view of Wideman et al. (6,127,421).

In Applicant's response on 05/09/2007, Applicant argues regarding the teachings in Wideman of anti-tumor utilities, the Examiner refers to a background citation therein of Taylor et al. 1992 and the statement that dietary administration of L-arginine to chicken reduces tumor growth. However, applicants submit that as the effective filing date of the above application, the knowledge in the art as to the anti-tumor/cancer effect of dietary arginine supplementation in mammals was highly controversial and various contradictory reports existed in the field as demonstrated in Yeatman T. J. et al. Depletion of Dietary Arginine Inhibits Growth of Metastatic Tumor, Arch. Surg. 1991, 126(11): 1376-92).

Art Unit: 1655

Applicant argument is not found persuasive because claims 31-74 still stand rejected under 35 U.S.C. 103(a) as set forth in examiner's non-final office action of 02/09/2007. Although Applicant argues the knowledge in the art as to the anti-tumor/cancer effect of dietary arginine supplementation in mammals was highly controversial and various contradictory reports existed in the field as demonstrated in Yeatman T. J. et al. Depletion of Dietary Arginine Inhibits Growth of Metastatic Tumor, Arch. Surg. 1991, 126(11): 1376-92), Wideman was cited by examiner to remedy the deficiency of Romanczyk. Romanczyk does not expressly teach that the active ingredient of L-arginine is contained within its claimed food composition. Examiner restates to applicant that Wideman does remedy the deficiency of Romanczyk. Wideman beneficially teaches (see, e.g. column 2 lines 30-39) that the incorporation of L-arginine within a food product is used for anti-tumor purposes. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Romanczyk's food composition to include the other claimed active ingredient of L-arginine as taught by Wideman within Romanczyk's food composition because the two above combined teachings would create the claimed food composition used for anti-tumor purposes. Moreover, as discussed in MPEP Section 2114.06, "it is prima facie obvious to combine two or more compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to used for the same purpose..." Furthermore, the adjustment of other conventional working conditions (e.g. the claimed forms of the food composition such as non-chocolate pet food and/or as a peanut and the claimed amounts), is deemed merely a matter of

Art Unit: 1655

judicious selection and routine optimization which is well within the purview of the skilled artisan.

Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made, especially in the absence of evidence to the contrary.

No claims are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
